MODULAR NAVIGATOR

By-Bhavesh Tushar Bhandari, a 15 yr old kid from BENGALURU, INDIA

It's a device that sits on your wrist and can help the visually impaired navigate more easily by using...

"HARDWARE"

HCSR04 SENSOR(Front): For detection of objects in Front

TP4056 MODULE: For charging battery by connecting USB-C cable

HCSR04 SENSOR(Right): For detection of objects on Right

HCSR04 SENSOR(Left): For detection of objects on Left

VIBRATOR MOTOR (Front): Used for giving Haptic Feedback for object in Front or Stairs

VIBRATOR MOTOR(Right): Used for giving Haptic Feedback for object on Right

VIBRATOR MOTOR(Right): Used for giving Haptic Feedback for object on Right

HCSR04 SENSOR(Stairs): For detection of Stairs or object below

ESP32 DEV BOARD: Used as a microcontroller for controlling sensors and devices
